Dog Park Upgrade Final Concept Plan

A draft concept plan was presented to the community in July 2018 and included an onsite consultation session. The concept and community engagement results are available online:

www.marion.sa.gov.au/hazelmere-road-reserve

The Final Concept Plan has been designed to create a dog exercise area that promotes community wellbeing and positive dog behaviour. The project will deliver a regional dog park where people can exercise their dogs as well as socialise with other dog owners.

Design features

-  **A separate area for small dogs**
-  **New double gate entries**
-  **More trees and landscaping**
-  **New shelters and more seating**
-  **Walking paths**
-  **New drink fountains with dog bowls**

Design elements to improve dog behaviour:

- Large, open concrete entries to discourage dogs lingering near the entry/exit gates
- Vegetation to divide the space into different areas:
 - active and passive spaces;
 - places to sniff and explore;
 - areas for interaction with another dog or owner.
- Distribution of amenities throughout the park (bench seats, drink fountains, shelters) to encourage owners and dogs to move around the park.
- Concrete circulation footpath to promote movement around the park.
