

RESERVE UPGRADE
 The concept for the reserve upgrade includes a new playspace, upgraded 3 on 3 basketball court and kick about area, biodiversity, bushfood planting and upgrades to existing paths including replacement of the footbridges and rubber paths to the eastern side of the reserve.

SITE HISTORY
 In the late 1800s the European colonists started cultivating vines, vegetables and orchards on the reserve's land. As part of this market garden, a large orange grove was established providing jobs for many families. The reserve upgrade celebrates the site's history with an orange themed playspace.

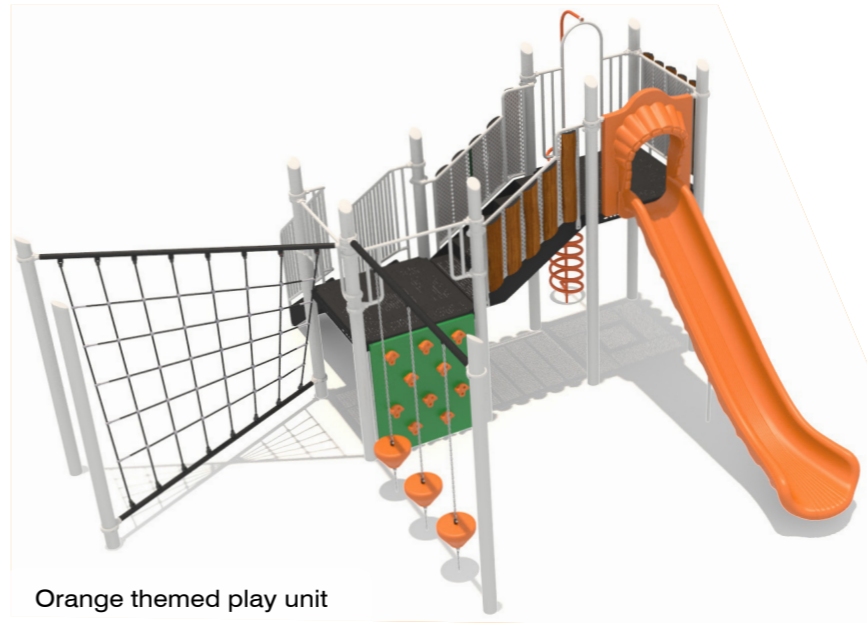

Playspace & kick about lawn
