

The rapid and continual removal of graffiti is most likely to reduce the re-occurrence of attacks

Graffiti Can Change the Face of Your Property Overnight

The City of Marion acknowledges and accepts that graffiti is a crime that defaces the clean and safe image of this City. Marion Council's Graffiti Prevention Program aims to prevent and reduce the incidence of graffiti.

The program operates by encouraging community involvement in the rapid removal of graffiti and the reporting of incidents to the most appropriate authority. Our efforts are constantly being reviewed and community feedback is always welcomed.

Rapid and Continual Removal is the Best Graffiti Prevention Tool.

In fact it is the single most important contribution residents and property owners can make in protecting their property and the image of their community.

DID YOU KNOW?

That the City of Marion will supply graffiti removal products **free of charge** (including paint) to businesses and residents within the Council area.

Graffiti removal products are available from City of Marion, City Services located at **935 Marion Road, Mitchell Park**, weekdays between 8am and 4pm.

The City of Marion would like to take this opportunity to thank everyone who contributes towards graffiti prevention

The following telephone numbers may be of interest:

- Graffiti removal from **Council –owned property**, please telephone the City of Marion on **8375 6600**

- If you become a victim of graffiti, please report the incident to the Sturt Police Station on **8207 4700**
- To report graffiti on **TransAdelaide** property please call **8218 4046**

HANDY HINTS

Test your graffiti remover on a small area of the graffiti you wish to remove first.

If you can not remove a few square centimetres, then you will not be able to remove several square meters. Up to 60% of graffiti removal from painted surfaces requires the area to be repainted.

Be sure when removing graffiti by the 'paint out' method that you match your colours/s as near as possible to the **original** colour of the surface.
