

OAKLANDS CROSSING COMMUNITY CONNECTIONS

24 April, 2020

Dear Resident

To complement the redevelopment of Oaklands Crossing, the City of Marion is working on an exciting project that we expect will significantly improve parking surrounding the railway station.

The project will achieve multiple benefits including:

- Enhanced streetscapes
- Better pedestrian and cyclist movement
- Creation of a larger public park at Dwyer Road Reserve with new playground and amenities
- Technologies that enhance the local community and visitor experience of the precinct

PURPOSE OF NOTIFICATION

We are about to install sensors and electronic signage in the commuter car parks surrounding the railway station.

Our aim is to reduce the impact on residential streets by being able to communicate the availability of commuter parking – both for the off-street car parking and designated station parking.

The sensors will gather data on the availability, occupancy, length of stay, days and times of usage, enabling us to improve our service delivery to local residents.

These works form part of the Oaklands Community Connections project in which Council has invested \$5 million for improvements within the surrounding area to Oaklands Crossing. This project has also received Federal Government funding of \$867,500 (Department of Infrastructure, Regional Development and Cities Building Our Future).

The contractor will be working from 7am – 5pm weekdays for about four weeks starting on 27 April 2020. This complies with the regulations outlined within the Environment Protection Act 1993.

Thank you for your understanding and patience. If you have any queries please contact me on 8375 6600.
